

MONOCLONAL ANTIBODIES

Anti-Protein C inhibitor

Mouse monoclonal antibody anti-protein C inhibitor, 4PCI, (IgG1)

Informations

Protein C inhibitor (PCI) is a plasma serine protease which primarily inhibits protein C but also inhibits thrombin, FXa, t-PA, trypsin, chymotrypsin. Its action is amplified in the presence of high concentrations of heparin.

Reference	Presentation	Format
4-TC21353	Vial	500 µg

Antigen : PCI and PCI target enzyme complexes.

Application : ELISA, immunodepletion, purification
Host : Mouse

Characteristics

Antibody lyophilized from an isotonic solution of 1 mg / mL in PBS buffer pH 7.4 containing 0.02% sodium azide. They must be reconstituted with 0.5mL of distilled water.
