#### **POLYCLONAL ANTIBODIES**

## Anti-fibrinogen

# Sheep pAb anti-porcine fibrinogen

Reference	Presentation	Format
9-PAPFGN-S	Vial	1 mg

### Informations

Fibrinogen is a soluble protein made by the liver. Under the action of thrombin, fibrinogen is converted into fibrin.

In association with FXIII, calcium ions, fibrin forms a stable network which ensures coagulation.

#### Antigen: porcine fibrinogen

Application: Immunoblotting, ELISA

Host: Sheep

#### Advantages

Custom needs by supplying you antibodies conjugated with biotin, HRP, FITC or other conjugates.

Special formulations are available upon request. Discount according to quantities

### Characteristics

The vast majority of antibodies is pure (without additives) with > 95 % purity SDS-PAGE. Stock antidobies are supplied in 50 % glycerol/water (v/v) for ease of storage and use. Both small, laboratory scale and bulk, production scale quantities are available. Expiration date of one year from delivery.
