

POLYCLONAL ANTIBODIES

Anti-tissue Factor

Sheep polyclonal antibody anti-human tissue Factor

Associated products

Goat polyclonal antibody anti-human tissue Factor (IgG)

Informations

Tissue Factor or FT is a cell surface glycoprotein. This factor initiates the extrinsic pathway of the coagulation cascade and is a high affinity receptor for FVII. The FVIIa / FT complex catalyzes the conversion of FX to FXa.

Reference	Presentation	Format
9-PAHTF-S	Vial	1 mg

Antigen: human FT

Application : Immunoblotting, ELISA

Host : Sheep

Immunogen: Purified recombinant tissue factor

Advantages

Custom needs by supplying you antibodies conjugated with biotin, HRP, FITC or other conjugates. Special formulations are available upon request. Discount according to quantities

Characteristics

The vast majority of antibodies is pure (without additives) with > 95 % purity SDS-PAGE. Stock antibodies are supplied in 50 % glycerol/water (v/v) for ease of storage and use. Both small, laboratory scale and bulk, production scale quantities are available. Expiration date of one year from delivery.
