Human Factor IX congenital deficient plasma >5%

Associated products

Human Factor II congenital deficient plasma >5%

Human Factor IX congenital deficient plasma
(severe <1%)

Human Factor V congenital deficient plasma
(severe <1%)

Informations

FIX is a vitamin K dependent glycoprotein synthesized by the liver. FIX can be activated to FIX in FIXa by FXIa or by FVIIIa in the presence of phospholipids and calcium. A person who is deficient in FIX has hemophilia B.

Reference	Presentation	Format
6-PPD09C	Vial	Minimum 50 mL

Plasma from a human donor with congenital FIX deficiency.

Packaging in bottle. The minimum packaged volume is 50 mL. The price offer is based on the volume requested.

Advantages

Minimize test time.
Ready to use.

Characteristics

Special plasmas are derived from patients with a congenital deficiency, severe or moderate, or presenting a particular profile.
No buffer or preservatives are added.
Quickly frozen at -80° C, the plasma maintains perfectly intact the matrix.
All plasmas are stable when stored at -40° C to -80° C.
We carefully pack with dry ice during shipment.
No additive or preservative.
Expiry date > 1 year.
Plastic vials.
