

# MONOCLONAL ANTIBODIES

## Anti- $\alpha$ -2-antiplasmin

# Mouse monoclonal antibody anti- $\alpha$ -2-Antiplasmin,7AP, IgG1

### Associated products

Mouse monoclonal antibody  
anti- $\alpha$ -2-Antiplasmin,14AP, IgG2a

### Informations

Alpha 2-antiplasmin ( $\alpha$ -2-antiplasmin or  $\alpha$ -2-AP) is the main inhibitor of plasmin, a key enzyme in fibrinolysis.

It binds to FXIII and fibrin, allowing stabilization of the thrombus.

Reference	Presentation	Format
4-TC21263	Vial	500 $\mu$ g

**Antigen : Recognizes the neoantigen of the plasmin-alpha-2-antiplasmin complex. Does not react with free plasminogen or free alpha-2-antiplasmin.**

Application : Immunoblotting, ELISA, inhibition of AP

Host : Mouse

Immunogen :  $\alpha$ -2-antiplasmin

### Characteristics

Antibodies lyophilized from a solution of 1 mg/mL in PBS buffer at pH 7.4 containing 0.02% sodium azide and 20 mg/mL mannitol. After reconstitution the antibodies should be aliquoted and stored at -20°C. Avoid repeated freezing and thawing cycles.
