

# MONOCLONAL ANTIBODIES

## Anti-Factor V

### Mouse monoclonal antibody anti-bovine FV, IgG1, ABV-5105

#### Associated products

Mouse monoclonal antibody anti-bovine FV, IgG1, ABV-5103

Mouse monoclonal antibody anti-bovine FV, IgG1, ABV-5104

Mouse monoclonal antibody anti-bovine FV, IgG1, ABV-5106

#### Informations

Factor V (FV) is a protein mainly synthesized by the liver. It is the enzymatic cofactor of FX and is activated in FVa by thrombin and / or FXa. It forms with FXa a complex which, in the presence of phospholipids and calcium, activates prothrombin to thrombin. The FVa is neutralized by the PCa.

Reference	Presentation	Format
9-ABV-5105	Vial	100 µg

**Antigen : bovine FVa light chain, bovine FV in the absence of Ca<sup>2+</sup>**

Application : RIA, Immunoblotting

Host : Mouse

Immunogen: Purified bovine factor V

#### Advantages

Custom needs by supplying you conjugated with biotin, HRP, FITC or other conjugates. Special formulations are available upon request. Discount according to quantities

#### Characteristics

The vast majority of antibodies is pure (without additives) with > 95 % purity SDS-PAGE. Stock antibodies are supplied in 50 % glycerol/water (v/v) for ease of storage and use. Both small, laboratory scale and bulk, production scale quantities are available. Expiration date of one year from delivery.
