

MONOCLONAL ANTIBODIES

Anti-Factor XI

Mouse monoclonal antibody anti-human Factor XI, IgG

Informations

Factor XI (FXI) is a protein synthesized by the liver. It participates in the contact phase which initiates the intrinsic pathway of coagulation. It is activated by FXIIa to factor FXIa which will itself activate FIX in the presence of calcium ions.

Origine : Mouse monoclonal antibody IgG
Antigen : human FXI antigen, human FXIa,

Application : Immunoblotting non reduced only, RIA, Inhibitory in clotting assay (aPTT), purification
Host : Mouse
Immunogen : Purified human FXI

Advantages

Custom needs by supplying you conjugated with biotin, HRP, FITC or other conjugates.
Special formulations are available upon request.
Discount according to quantities

Characteristics

The vast majority of antibodies is pure (without additives) with > 95 % purity SDS-PAGE. Stock antibodies are supplied in 50 % glycerol/water (v/v) for ease of storage and use. Both small, laboratory scale and bulk, production scale quantities are available. Expiration date of one year from delivery.
