Anti-Factor IX

Sheep polyclonal antibody anti-human Factor IX

Associated products

Chicken polyclonal antibody anti-human Factor IX

Sheep polyclonal antibody anti-human Factor XI

Sheep polyclonal antibody Anti-rat Factor IX

Informations

Factor IX is a glycoprotein synthesized by the liver, zymogen of a serine protease. It is a factor dependent on vitamin K and its plasma half-life is 20 to 24 hours. It can be activated to FIXa by FXIa or FVIIIa in the presence of phospholipids and calcium.

Reference	Presentation	Format
9-PAHFIX-S	Vial	1 mg
9-PAHFIX-S-5	Flacon	5 mg
9-PAHFIX-SAP	Vial	100 µg

Antigen: Human Factor IX

Application : Immunoblotting, ELISA

Host : Sheep

Immunogen: Purified human FIX

Advantages

Custom needs by supplying you antibodies conjugated with biotin, HRP, FITC or other conjugates. Special formulations are available upon request. Discount according to quantities

Characteristics

The vast majority of antibodies is pure (without additives) with > 95 % purity SDS-PAGE. Stock antibodies are supplied in 50 % glycerol/water (v/v) for ease of storage and use. Both small, laboratory scale and bulk, production scale quantities are available. Expiration date of one year from delivery.
