POLYCLONAL ANTIBODIES

Anti-fibrinogen

Sheep pAb anti-porcine fibrinogen

RUO -25°C -15°C

Reference	Presentation	Format
9-PAPFGN-S	Vial	1 mg

Informations

Fibrinogen is a soluble protein made by the liver.
Under the action of thrombin, fibrinogen is converted into fibrin.
In association with FXIII, calcium ions, fibrin forms a stable network which ensures coagulation.

Antigen: porcine fibrinogen

Application : Immunoblotting, ELISA
Host : Sheep

Advantages

Custom needs by supplying you antibodies conjugated with biotin, HRP, FITC or other conjugates.
Special formulations are available upon request.
Discount according to quantities

Characteristics

The vast majority of antibodies is pure (without additives) with > 95 % purity SDS-PAGE.
Stock antidobies are supplied in 50 % glycerol/water (v/v) for ease of storage and use.
Both small, laboratory scale and bulk, production scale quantities are available.
Expiration date of one year from delivery.
