

# POLYCLONAL ANTIBODIES

## Anti-tissue Factor

### Sheep polyclonal antibody anti-human tissue Factor

#### Associated products

Goat polyclonal antibody anti-human tissue Factor (IgG)

#### Informations

Tissue Factor or FT is a cell surface glycoprotein. This factor initiates the extrinsic pathway of the coagulation cascade and is a high affinity receptor for FVII. The FVIIa / FT complex catalyzes the conversion of FX to FXa.

Reference	Presentation	Format
9-PAHTF-S	Vial	1 mg

**Antigen: human FT**

Application : Immunoblotting, ELISA

Host : Sheep

Immunogen: Purified recombinant tissue factor

#### Advantages

Custom needs by supplying you antibodies conjugated with biotin, HRP, FITC or other conjugates. Special formulations are available upon request. Discount according to quantities

#### Characteristics

The vast majority of antibodies is pure (without additives) with > 95 % purity SDS-PAGE. Stock antibodies are supplied in 50 % glycerol/water (v/v) for ease of storage and use. Both small, laboratory scale and bulk, production scale quantities are available. Expiration date of one year from delivery.
